Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. Applicant's amendment of November 17, 2004 is acknowledged. It is noted that claims 1-3 are amended.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Hirai (1755493477).

in regarding to claim 1, Hirai discloses (figure 2) a PC cartridge having enhanced front connecting structure, comprising an upper shell (3, adjacent 12); a bottom shell (3, 1), a plurality of packing rubbers (1a, 1a) located at two sides of the bottom shell (3, 1); a plurality of connection ports (9, 10) having a front connection port (adjacent 9) and a rear connector (adjacent 10), a plurality of folded hooks (11₂) with n-shaped structure at two front corner of the upper shell (3) wherein the plurality of folded hooks (11₂) are on the same side of the front connection port (adjacent 9); and a plurality of retaining slots (6₂) at the front ends of the packing rubbers (1a, 1a) for engaging with the plurality of folded hooks (11₂), wherein the plurality of retaining slots (6₂) are on the same side of the front connection port (adjacent 9) . "for connecting a computer or other peripheral circuit" and "for connecting cables" are not positively recited.

In regarding to claim 2, Hirai discloses the PC cartridge (figure 2) wherein a circuit board

(2) having predetermined software and data stored therein (by IC) located between the upper shell (3) and the bottom shell (3, 1).

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Anhalt et al (1755572408), Cox et al (US6191950), Lin (1756049462), and Kimura et al (U56269537) are cited to show in the PC cartridge having the plurality of flanges on the sides of the connector housing.

Allowable Subject Matter

4. Claims 3-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Responses to Arguments

5. Applicant argues that “The Hirai patent does not disclose a cartridge in which the rear of the upper shell is snapped into the packing rubbers” is not deemed persuasive; because this limitation is not recited in claims 1-2.

6. Applicant argues that “The Hirai patent does not disclose ... the front of the upper shell is provided with hooks at its corners and corresponding slots that are on the same side as the front connection port” is not deemed persuasive; the Hirai patent does have the front of the upper shell (3) is provided with hooks (11₂) at its corners and corresponding slots (6₂) that are on the same side as the front connection port (adjacent 9) as seen in figure 2.

7. Applicant argues that “The different functions of the claimed hooks 11₂ of Hirai is apparent from the fact that the hooks of the claimed invention are situated at “corners” of the cartridge, whereas the hooks 11₂ of Hirai are situated closer to the middle of the so-called “front”

end” is not deemed persuasive; because “corners” as claimed is so broadly recited; it can be understood as at the edges or the areas adjacent to the edges of the cartridge.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
